Matters relating to ILO premises

Update on the premises for the ILO Regional Office for Africa and Country Office for Côte d'Ivoire, Benin, Burkina Faso, Mali, Niger and Togo in Abidjan

We have taken note that in February 2021 the Resident Coordinator proposed to the ILO Regional Office for Africa to incorporate the future UN House into the renovation project of ILO-owned premises in Abidjan.

The ILO informed the Resident Coordinator of its willingness to support the common premises initiative in the context of the UN Reform, subject to confirmation from the Government of the Ivory Coast of its commitment to the financing of the future UN house. However, to date the Government has not committed to any financial contribution.

We also understand that the redevelopment of the ILO premises in Abidjan which the Governing Body agreed in October 2020 for an amount of USD 7.2 million is currently stalled pending developments on the establishment of the UN house.

During the information session held on February 28, 2022, the Office indicated that the current building is deteriorating and that the more one waits, the higher the costs of renovation could become. It was also indicated that at this stage it was not guaranteed that the other UN organisations would have the necessary funds for the UN House, a project that will certainly be more expensive than the initial ILO project. This issue is further complicated by the fact that the Government of the Ivory Coast hasn't yet indicated its commitment to the financing of the future UN house.

Therefore, while agreeing with the decision point, we request that the Office follows developments closely and comes back to the Governing Body as soon as possible in order to avoid an increase in the costs of the renovation due to a lack of decision on the way forward, bearing also in mind that the ILO owns the land upon which the future ILO building or UN house will be built.

Finally, the Workers' Group would like to reiterate the importance for social partners to have access to the building of the African Development Bank which currently hosts ILO offices. In previous GB discussions, we had indicated that administrative procedures to access the building were particularly cumbersome, making work relations difficult.
